Laser Eye Surgery by our Maltese Specialist

Dr Ivan Vella MD, FRCS, FRCS (OPHTH)

- Do you wear glasses or contact lenses?
- Do you have trouble seeing far away or up close?
- Do you dream of playing your favorite sport without glasses?

If you answered **YES** to the above questions then you know how annoying wearing glasses can be. You need to make sure that you have them at the ready whenever you may need to see something.

Eye glasses are also very expensive and cumbersome. Some people prefer contact lenses, but even these can be annoying and a bad choice for use. They are expensive and they tend to irritate the eyes. For so long, these were really the only options that people had if they had poor eyesight and wanted to see clearly. Luckily, that isn't the case anymore.

With our latest generation excimer laser treatment, you can now remove your glasses and see clearly once and for all. The procedure is proven, fast, safe and effective.
