Saint James Hospital Group

Aiming to become an internationally acknowledged location of choice for healthcare and a centre of excellence, Saint James Hospital Group is committed to maintaining the Group’s position as the providers of outstanding and innovative healthcare. What started off as a family clinic in a local town has now developed into Saint James Hospital Group operating various Hospitals, a dedicated Eye Clinic, a Cosmetic Dermatology Clinic, an Out-Patient Clinic, a Drug and Alcohol Rehabilitation Facility and other various companies related to healthcare.

The Group also owns and operates a Hospital in Tripoli, Libya and an eye clinic in Budapest, Hungary. Providing patients with an excellent medical service is our commitment.

This we have always believed in...

...and will always maintain...

...Because our family cares.
SAINT JAMES HOSPITAL GROUP

Saint James Hospital was the brainchild of Dr Josie Muscat, the present Chairman of the Group, founded in 1986. Rapidly evolving into a leading medical institution, the Group has always revolved around four fundamental principles namely:

• Technology & Innovation
• Quality
• Hand picked non medical & paramedical staff
• Top calibre medical personnel

Whilst maintaining these pillars at the foundation of all our endeavours we strongly nurture the philosophy of providing centres of excellence in the healthcare sector.

Saint James Hospital Group today employs over 650 personnel.

Development & Growth

What started off as a family clinic in a local Maltese town in 1986 has developed into the Saint James Hospital Group currently operating:

• 3 Hospitals (Malta & Libya)
• 3 Specialised Eye Clinics (Malta, Libya & Hungary)
• 1 Cosmetic Dermatology Clinic (Malta)
• 1 Out-Patient Clinic (Malta)

Over the past 23 years, the Saint James Hospital Group has continued to expand and diversify its holding interests into other healthcare related areas by creating subsidiary companies, namely:

Jamesco Trading Company Ltd (a medical import and distribution company)
Waste Solutions Ltd (Specialized in the disposal of clinical waste)
Mobilise Ltd (a company specializing in Health Tourism)
Medical Laboratory Services (management of medical laboratories)

  Urologist
Saint James Hospital operates **24/7 ambulance** service to cover the range of Tripoli and its surrounding areas. We can meet your operational needs as well as those of the patient in the shortest time possible.

Our **contracted members** are assigned an independent **24-hour emergency number** in case of required immediate care response.

Every call out is manned by BLS/ACLS certified personnel a trained driver and a doctor. Our professional ambulance crew provides first class care and handling, responding to a range of patient movement needs and emergency incidents. All personnel are trained and certified by Lifeskills Medical the UK’s largest provider of pre hospital care. Our vehicles are front line A&E ambulances equipped to UK and EU specifications and include the here under medical equipment amongst other:

- Stethoscope
- Sphygmomanometer
- D-Type stretcher
- Spinal Board with straps
- Extrication Device (KED)
- Adjustable cervical collars
- Head Immobiliser
- PASG (Pneumatic Anti-Shock Garment)
- BP / SpO2 / ECG Monitor
- AED
- Orange Splints (Long and Short)
- Suction Apparatus
- Oxygen
- Emergency Drugs
- Oro-pharyngeal Airways
- Naso-pharyngeal Airways
- Haemo glucotest machine
- Wheel Chair

Response time is kept to a bare minimum. Our trained operations team continuously strives to ensure professional and appropriate treatment for the patient.

St. James Medical Laboratory provides a comprehensive pathology service covering the major medical laboratory disciplines of Clinical Biochemistry, Clinical Haematology, Endocrinology, Immunology, Microbiology, Histology and Cytology, Molecular Diagnostics (PCR) and Food Microbiology. Expert method development and validation is also available.

The laboratory is staffed by Biomedical Scientists, Consultant Pathologists and Consultant Scientists who are available to provide clinical direction, interpretation of results and to give medical advice. Where appropriate Saint James Medical Laboratory out-sources tests to other accredited or specialist laboratories including The Doctors Laboratory (TDL) in London, UK to ensure that all requests are fully complied with.

Saint James Medical Laboratory is dedicated to the provision of a total quality service and to meet this goal employs a high caliber of Consultant Medical, Scientific and Administrative staff. Structured in-house training programmes and external continuous education schemes ensure that the laboratory staff constantly update their knowledge, refine their skills and remain aware of new developments.

In order to monitor the accuracy and precision of analysis, all laboratory tests are carried out with strict adherence to well-established standard operating procedures and a stringent quality control programme is incorporated into the laboratory daily routine.
At Saint James Hospital we offer on-call 24/7 General Practitioner Services for our members. We currently have 3 Resident Medical Officers (General Practitioners) who are solely focused on operating our out patients clinics. Our members are given a dedicated emergency number which will allow the patient to speak directly to the GP on duty.

We strive to find and successfully treat medical conditions before they become serious enough to require hospitalization or emergency treatment. We also provide follow-up, continuity of care, pharmacy assistance, and supportive services to help patients in need.

**Our Primary Healthcare Services:**

» Family Practice (adult & Children)
» Yearly Immunizations and specialized vaccinations
» Preventive Health Exams and routine check ups
» Acute & Chronic Illness Care
» Prescription Drugs
» Follow ups
» Home visitations
» Translation Services
» Pre employment & Yearly Medical Screening

All our physicians have special training and interest in specific areas, including women’s health, sports medicine, geriatrics, asthma, school problems, depression, pediatrics, and other fields.

The Saint James Hospital team includes specialists in dermatology, ear, nose, and throat, obstetrics and gynecology and Physical Therapy. Our Electronic Health Records system ensures your primary care General Practitioner will be kept up to date on diagnoses and treatments by our specialist consultants.
